

# Responsible Visitor Charter

We encourage all of our guests to be responsible visitors and we can all reduce our impact on the environment by making the right choices. As a visitor you have a very important role to play in helping England conserve its natural assets and become a more sustainable destination.

## Here are some ideas on how you can help:

- Save energy – switch off lights, close windows if heating is on and identify unused towels to save laundry
- Give the car a rest – use the local bus, walk or hire a bike
- Shop locally – we have links to local shops where you can purchase local and/or organic foods. If you can't find what you want, please ask a member of staff.
- Recycle – there are many different recycling bins available both within the various properties and around the farm.
- Compost – a small white bin in the kitchen is provided for you to help us towards composting. Full details of what may be composted are listed in the recycling section of the property manual.
- Left-over food – a second white bin is provided to segregate waste food ready to feed to our chickens. A very rewarding aspect of recycling as they provide us all with fresh eggs!
- Be water wise – turn off the tap when brushing your teeth and again, use towels wisely
- Respect nature – help us to look after the landscape and wildlife by using footpaths and cycle-ways responsibly and not littering. Use the outside lights sparingly as they can disturb the bats who share the farm buildings.
- Support other Green Tourism businesses
